
PRESS RELEASE**LEONARDO LAUNCHED THE “2026 TRANSITION PLAN”:
BUILDING RESILIENCE ACROSS THE TRANSITION**

- **The Plan is a roadmap of concrete investments for competitiveness and resilience**
- **€1.2 billion invested in climate transition, emissions *Scope I & II MB* down 44% (from 2020) and revenues up 41% (from 2019): Leonardo links growth, capital allocation and lower environmental impact to strengthen enduring performance and adaptability**

Rome, 23 June 2026 - Growing the business while consuming fewer resources is no longer a trade-off for Leonardo, it is the strategy. With the “**2026 Transition Plan**”, the **Group makes the climate and environmental transition a structural part of its Industrial Plan and long-term business strategy**, with one clear aim: **building resilience across the transition**.

The commitment is grounded in the **2026-2030 Industrial Plan**, where Leonardo has earmarked around **€1.2 billion** for investments relevant to climate transition, while **79% of the Group’s financing is now linked to ESG parameters through dedicated instruments**. And it is backed by people: **64% of the workforce holds STEM qualifications, and more than 37,000 employees trained on sustainability topics over the past year**.

The **2026 Transition Plan** is built around **three pillars - Ambition, Actions and Accountability** - spanning climate strategy, investments, natural resources and circularity, alongside a Just transition focused on skills, inclusion and people. Digital transition acts a core enabler across all areas bringing data, technologies and skills together to deliver on the plan.

The track record speaks for itself: **against revenue growth of 41%** (vs. 2019 baseline), **Leonardo has cut direct emissions *Scope I and Scope II MB (Market Based)* by 44%** (vs. 2020 baseline), **external grid electricity purchases by 32%, water withdrawals by 23% and waste by 22%** (vs. 2019 baseline). These results highlight Leonardo’s ability to combine operational performance with efficiency gains and lower resource use.

The Plan also sharpens Leonardo’s view of climate-related risk along the supply chain and steps up work on critical raw materials, including the [CRM4Defence project](#), strengthening the Group’s ability to anticipate emerging vulnerabilities and safeguard long-term operational security.

A strategy that continues to earn international recognition: Leonardo has been recently confirmed as an ESG leader in the Dow Jones Best-in-Class Indices for the sixteenth consecutive year, achieving the highest score in the Aerospace, Defence & Security sector and standing out significantly from its international peers.
