BUSINESS COMPLIANCE

Focus on Lobbying
Leonardo conducts its business in compliance with the principles of loyalty, fairness, transparency, efficiency, obedience to the law and the values expressed in the Leonardo S.p.a, Code of Ethics, as well in the Charter of Values, the Anti-Corruption Code and the Policy on the Respect of Human Rights, applicable to the entire Leonardo Group, requiring a similar behavior by all of its employees, suppliers, business and financial partners, consultants, etc.

Leonardo requires strict compliance with the principles and standards of conduct set forth in Leonardo's Code of Ethics and its Anti-Corruption Code, by all employees, members of the Board of Directors and third parties, including those performing lobbying.

Lobbying activities aim at advocating the Company’s interests and supporting the Company’s position in the legislative and administrative bodies of the territory in a responsible manner. The Company does not tolerate any conduct in violation of the rules and, therefore, contrary to the values of Leonardo, providing for specific rules applicable to the third parties as well as contractual clauses safeguarding the Company against any improper behavior.

The appointment of external lobbyists is regulated by the Leonardo Directive 02/2021 which sets the principles and rules for the selection, assessment and approval of agreements related to all external commercial consultants, including those performing lobbying in territories where the local legislation permits this kind of consultancy. The Directive is the internal document applicable to all Leonardo Group Italian and foreign Subsidiaries which also establishes the standards related to oversight mechanisms of control in order to counter, among others, bribery, corruption and unethical behavior. The oversight control system is, in first instance, ensured by the competent Company Marketing and Sales structures and followed by a more enhanced analysis by the relevant Compliance functions, as described in this document as well as in the Abstract of Directive 2/2021. Any conduct by persons other than the personnel of the Leonardo Group in breach of the Anti-corruption Code or the Anti-corruption law, will be examined to evaluate whether it is necessary to adopt appropriate measures to protect the Company, such as unilateral termination of the contract, and will be provided by specific contractual clauses.

The process related to the selection, assessment and appointment of the Lobbyists (LO) is the same as for Commercial Advisors (CA), Sales Promoters (SP), Commercial Distributors (CD) and Resellers (CR) and, likewise, is carried out on the basis of transparency, competence, cost-efficiency and fairness. The process requires an accurate evaluation of the risks associated to the lobbying appointment (Enhanced Due Diligence), as indicated in the abstract of Directive 2/2021, and the proposed remuneration must be consistent with the activities to be performed by the Lobbyist defined clearly in the specific contract.

The principles that must be complied with are:

- identification and segregation of responsibilities;
- clear designation of signing authority;

1 Leonardo Spa is the first company among the top ten global players in the Aerospace, Defense and Security sector to obtain ISO 37001:2016 "Anti bribery management systems" certification, the first international standard for anti-corruption management systems.
2 The ethical principles set forth by the Leonardo S.p.a. Code of Ethics are shared by all directly or indirectly controlled Subsidiaries and are binding on all the recipients.
3 The appointment of lobbyists is normed by the Leonardo Directive 02/2021 and is permitted exclusively for the Subsidiaries incorporated under a non-Italian law.
4 Leonardo Group Anti-corruption Code, pag. 25, English Version
- clarity and simplicity;
- impartiality and absence of conflicts of interest;
- traceability and accurate record-keeping.

During the Due Diligence activities, all candidates are required to declare they have received all relevant Leonardo documentation, including the Code of Ethics, the Anti-corruption Code and the Charter of Values. All third parties are mandatorily required to be aligned with and act in accordance with the abovementioned documents and with any relevant Company procedural standards and policies, as well as with all applicable national and international anti-corruption and anti-bribery legislation, in order to finalize the relevant contract. These requirements are also always reflected in the contractual clauses. Third parties are contractually obliged to submit periodic “Activity Reports” with evidence of all activities performed in relation to the appointment, substantiating all the elements necessary to identify the efforts provided in favor of Leonardo. All reports are scrutinized and approved by the competent Company Units, in order to ensure continuous oversight and monitoring and, if necessary, activate additional verifications.

All candidates must declare to perform training to their employees on the topics of ethics, anti-corruption and compliance.

All the above documentation and declarations as well as the successful performance of the Leonardo training course are mandatory conditions required in order to collaborate with Leonardo. No exceptions are allowed.

With reference to Leonardo Group in-house lobbyists, employees who perform activities involving both formal and informal contacts with politicians and senior public officials in accordance with their role in the Company, they are subject to the general internal Codes and rules as well as to specific provisions in accordance with the relevant legislation and regulation in force. The conduct of all internal lobbyists is continuously monitored by their hierarchical supervisors in order to ensure compliance with the internal rules. Furthermore, in compliance with the Italian anti-corruption legislation, Leonardo S.p.a. employees must submit a specific declaration certifying the public authorities met, the date, place and topics discussed. All such declarations are timely submitted to the Leonardo Surveillance Body for appropriate information and analysis. Likewise, Leonardo Group employees worldwide are subject to analogous monitoring and oversight mechanisms of control, structured in accordance with the criteria set by the relevant internal Company rules and applicable laws and regulations.

As far as lobbying activities in Italy are concerned, despite no laws or regulations are in force, the Presidential Office of the Chamber of Deputies of the Italian Parliament has issued a resolution dated 8 February 2017 that disciplines the activity of representing interests in the Chamber of Deputies⁵. Leonardo has duly and timely registered its in-house lobbyist professionals (Company employees) who carry out activities of representation of interests towards Members of the Chamber in the relevant Register⁶.

All registered parties must abide by the Code of Conduct, as defined in Annex 3 of the 2014 European Union Interinstitutional Agreement on said Transparency Register\textsuperscript{11}.

**REPORTING 2021**

The expenditure related to lobbying carried out during 2021 exclusively by the Leonardo Group Subsidiaries incorporated under non-Italian law amounts to approximately USD 1.8 million (unchanged respect to 2020, $ 1.5 million in both 2019 and 2018), referred mainly to the area of North America (mostly USA) and Poland. In particular, among the main areas for which the Group’s foreign Subsidiaries made use of the support from lobbyists during the year are those involving the development of technologies for infrastructure and transport, the purchase and / or upgrade of aircraft on the part of government agencies (including aircraft for firefighting, search and rescue missions), research and development programmes for submarine programmes, naval systems, ground-based and satellite communication systems. The breakdown of the expenditure relating to lobbying activities carried out by external consultants and by employees (in-house) of the Group’s foreign subsidiaries is shown in the graph below.
