

## Focus on national interests

## Leonardo, delivering value for Italy

## Partner in ideas and projects

## “Rilancio Italia” and Leonardo 2030: synergies and national projects

- The Covid-19 pandemic has placed the world in an emergency on a scale unprecedented at any time in our recent past.
- It marks the beginning of a new era in the history of our country – and of the entire planet – in which the extraordinary measures put in place by the government could become an opportunity to relaunch the **country’s whole economic system**.
- On the basis of a shared vision of the future, Leonardo is ready to work side by side with national institutions to make **Italy** more **modern** and **stronger**, **competitive** and **attractive, innovative** and **sustainable**.
- The vision contained in **Be Tomorrow – Leonardo 2030** is intimately bound up with issues of strategic relevance for the country’s development. This is the driving force Leonardo has to offer the Italian economy.
- We have fine-tuned a **strategic project “engagement matrix”** with the Italian government: to participate in processes of change in the country leveraging **the free contribution of ideas**, rather than products.
- We are committed to offering our skills and technologies in the areas of Aerospace, Defence and Security to support national projects focusing on areas adjacent to our core business which are of crucial importance for relaunching the Italian economy.
- These include, among others, technologies that may be used in the **medical sector** and in **digitalisation of the supply chain**.
