

Abu Dhabi Aviation expands Leonardo AW139 offshore helicopter fleet

- **Order for two additional Leonardo AW139s with deliveries expected in 2017**
- **Abu Dhabi Aviation already operates 15 AW139 helicopters**
- **World best seller with over 1000 units ordered by 250 customers in 70 countries worldwide**

Dubai, 13 November 2017 – Leonardo announced today that Abu Dhabi Aviation (ADA) has signed a contract for two additional AW139 intermediate twin engine helicopters. The announcement was made during an official ceremony at the Dubai Air Show. The aircraft will be used to perform offshore transport mission with deliveries expected in 2017, further expanding ADA's AW139 fleet which today accounts of 15 units in service primarily supporting the Oil & Gas industry. This latest order is part of an agreement for 15 helicopters including the AW139/AW169/AW189 types with deliveries through to 2019 announced at the end of 2015.

"Owning a fleet of ultra-fast aircraft and a state-of-the-art safety system has helped Abu Dhabi Aviation to drive its operations to the highest level of customer service," said H.E. Nader Ahmed Al Hammadi, Chairman of Abu Dhabi Aviation. "The services provided by Abu Dhabi Aviation are driven by customer's needs. These helicopters are widely used in the UAE, the GCC and the Middle East. ADA's AW139s benefit from the support solutions provided locally by AgustaWestland Aviation Services LLC, an Abu Dhabi Aviation (ADA) and Leonardo joint venture delivering thorough support and maintenance services in the region."

"The company has recently expanded its fleet to cover its contractual obligations inside and outside the U.A.E. and to further its investment in the aviation industry."

"Abu Dhabi Aviation Services are among the top services provided across the Middle East and the world, especially in the field of operation, maintenance and training." He added.

With over 140 AW139s ordered in the Middle East, more than 60 of which by customers in UAE, this model has demonstrated extremely successful for a wide range of commercial and government roles across the region and has set new standards for offshore transport duties.

Abu Dhabi Aviation has established, in cooperation with Leonardo, a maintenance center under the name of AgustaWestland Aviation Services L.L.C. to expand its scope of services and meet the growing needs of the helicopter fleet in the Middle East. Having almost completed the provision of helicopter maintenance, repair and overhauling as well as all relevant logistic services. The joint venture is poised to provide maintenance, repair and overhauling for a wide range of these helicopters' components.

The Company also plans to provide specialized services to support the full range of the new generation AgustaWestland aircrafts in the region. Since its inception, late 2011 and reaching its full operational capacity in 2013, the company has taken huge steps towards providing an expanding range of full-fledged services and activities with plans to sell helicopter spare parts and accessories and carry out helicopter/ component repairs, overhauling, customization, modification and upgrading. Leonardo and Abu Dhabi Aviation have been able to unify their efforts thanks to the combination of their engineering and maintenance expertise and the local partner's willingness to invest in the latest technologies.

The Company has already acquired the capabilities to provide support to the latest AgustaWestland aircrafts: AW169 and AW189 to operators in the region. Therefore AgustaWestland Aviation Services is expected to become one of the major support centers of the latest generation of AgustaWestland aircraft.

Note to editors on the AW139 helicopter

The AW139 sets new standards in view of its advanced technology, high performance, reliability, safety, role flexibility and cabin space. Its modern avionics reduce crew workload allowing the pilot to focus on the mission. Over 250 customers from around 70 nations have already ordered more than 1,000 AW139s, nearly 900 of which are in service, confirming itself as the bestselling aircraft in its category. The AW139 is able to perform a wide range of roles also including offshore & corporate/VIP transport, EMS, SAR and law enforcement.

About Leonardo

Leonardo is among the top ten global players in Aerospace, Defence and Security and Italy's main industrial company. As a single entity from January 2016, organised into seven business divisions (Helicopters; Aircraft; Aero-structures; Airborne & Space Systems; Land & Naval Defence Electronics; Defence Systems; Security & Information Systems), Leonardo operates in the most competitive international markets by leveraging its areas of technology and product leadership. Listed on the Milan Stock Exchange (LDO), in 2016 Leonardo recorded consolidated revenues of 12 billion Euros and has a significant industrial presence in Italy, the UK, the U.S. and Poland.
