

CDP, LEONARDO, SOGEI AND TIM PRESENT PROPOSAL TO CREATE NATIONAL STRATEGIC HUB

The project seeks to provide Cloud services and infrastructure to the PA by pooling the partners' specific expertise and the best Italian and international technologies

The National Strategic Hub is part of an overall plan for the digital transformation of the PA, in line with the provisions of the Italian Recovery and Resilience Plan, and aims to ensure greater levels of efficiency, security and reliability in data processing

Rome, 28 September 2021 – Cassa Depositi e Prestiti (through the subsidiary CDP Equity), Leonardo, Sogei and TIM, as the promoter entity, have jointly presented the Italian Ministry for Technological Innovation and the Digital Transition (MITD) with a proposal for a public-private partnership for the creation of the National Strategic Hub (NSH) – an infrastructure for cloud-based management of Public Administration (PA) data and applications, forming part of the overall plan to accelerate digital transformation and guarantee national data security and control.

If awarded to the promoter and following a tender announced by the Public Administration, the initiative would involve setting up a NewCo with a 20% stake to be held by CDP, 25% by Leonardo, 10% by Sogei and 45% by TIM. The aim is to provide innovative services to citizens and businesses, in line with the provisions of the Italian Recovery and Resilience Plan and recent regulatory interventions on digital infrastructure. The project consists of providing cloud solutions and services to support the PA with a view to ensuring the highest possible level of data efficiency, security and reliability.

The presentation of the proposal by the promoter, if deemed of interest, will allow the PA to launch a public tender in a short time. In particular, the Public Administration must examine the proposal within three months of its receipt and, if assessed positively, it will launch the tender in which, in addition to the promoter, all interested subjects may participate.

If the tender is awarded to the promoter, the new company will have all the necessary industrial expertise to provide the services (also by gaining expertise from its members) and will make the investments needed for creating the technological infrastructure.

This is the framework for the joint initiative of CDP, Leonardo, Sogei and TIM through a public-private partnership with the aim of encouraging and speeding up technological innovation and the security of public infrastructures.

The project will involve economic operators of primary importance in technological and digital services with the aim of pooling the best expertise and the most advanced national and international

technologies, also collaborating with Cloud Service Providers and leading technology suppliers, which will be managed according to the principles of sovereignty established by the regulation.

Specifically, as industrial partners: TIM, the Italian leader of the ICT sector, will provide infrastructure services and cloud platforms; Leonardo, one of the world's leading players in the AD&S sector and the only Italian company dedicated to monitoring strategic technologies for the country's security, will provide security services; Sogei, a leader and partner in the public ICT sector, will provide business culture enablement and training services to boost the growth and expertise of the PA; CDP Equity will act as the financial partner and institutional investor supporting initiatives with significant development prospects in key sectors for the country.

Together, the industrial partners will provide end-to-end migration services and support PAs with professional evolution services to ensure maximum efficiency and effectiveness when operating in cloud environments (re-platform and re-architect).

Through the partners, the NSH will have new generation (Tier IV) data centres, with high levels of security and energy efficiency and in line with global best practices (four data centres in two regions), and will furthermore provide comprehensive and advanced services with a particular focus on cloud solutions. The PA will be supported throughout the pre- and post-contract phases, including in terms of staff training.

For Leonardo the above operation, with reference to the planned establishment of a NewCo in case of award to the promoter and with regard to the correlation relationship with Cdp Equity and Sogei (companies owned by the Ministry of Economy and Finance, holding 100% in Cdp Equity – through CDP – and 100% in Sogei, as well as around 30,204% into Leonardo) is a related party transaction of "lesser importance". The mentioned transaction benefited of the exemption from the application of the Procedure approved by the Company's Board of Directors, provided for the transactions to be concluded under market-equivalent or standard terms, pursuant to article 11.2, letter c) of the above mentioned Procedure and in accordance with article 13, subsection 3, letter c) of Consob Regulations no. 17221/2010 (as amended and supplemented).

The above taking into account the overall assessment of consistency with market conditions and fairness of the proposal's economic contents by the granting Administration, through a public tender procedure and competitive comparison.
