Leonardo: U.S. Department of Defense awards \$ 29 million contract for new AW119Kx helicopters in Foreign Military Sale to Israel

Israel's Ministry of Defence previously ordered seven AW119Kx helicopters plus a comprehensive training service and capabilities package in 2019

The AW119's success among defense and homeland security operators has been growing in years in many nations including USA, Portugal, Finland, Latvia, Brazil, Ecuador, Republic of Korea among others

Philadelphia, 20/04/2022 – Leonardo welcomes the \$ 29 million USD contract award by the U.S. Department of Defense for new AW119Kx aircraft in the framework of Foreign Military Sales (FMS) to Israel, with the U.S. Army Contracting Command as the contracting activity. The aircraft will be fully produced at Leonardo's facility in Philadelphia, Pennsylvania.

Israel's Ministry of Defence is already an AW119Kx customer. In 2019 a contract was signed for a comprehensive range of integrated defense training capabilities, which included seven AW119Kx single engine helicopters to be produced in the United States. The comprehensive training program also includes full flight simulators and other training devices, newly built facilities and a 20-year support package.

The best-in-class single engine helicopter available, the multirole AW119 has proven increasingly successful in recent years in the world's defense market for both training and operational mission profiles. In 2020, the U.S. Department of Defense awarded a contract for up to 130 AW119's to replace the aging TH-57 Sea Ranger as the primary training helicopter for the U.S. Navy, Marine Corps and Coast Guard, with 104 units on order to date. Additionally, the Portuguese Air Force presently uses their fleet of five AW119s for training, MEDEVAC, troop transport and short range maritime SAR and may be used for firefighting.

The number of AW119 operators continues to grow as the type has been chosen for defense, homeland security and law enforcement missions by operators in countries such as USA, Portugal, Finland, Latvia, Brazil, Ecuador, and the Republic of Korea, among others.

The versatile AW119 features both VFR and IFR capable core avionic systems for enhanced situational awareness, mission effectiveness and safety, giving operators different options to meet their specific needs. The type delivers outstanding overall performance with a strong power margin and the largest cabin in its category, able to accommodate up to six passengers depending on configuration. Over 470 AW119s have been sold to date.

Leonardo, a global high-technology company, is among the top world players in Aerospace, Defense and Security and Italy's main industrial company. Organized into five business divisions, Leonardo has a significant industrial presence in Italy, the United Kingdom, Poland and the USA, where it also operates through subsidiaries that include Leonardo DRS (defense electronics), and joint ventures and partnerships: ATR, MBDA, Telespazio, Thales Alenia Space and Avio. Leonardo competes in the most important international markets by leveraging its areas of technological and product leadership (Helicopters, Aircraft, Aerostructures, Electronics, Cyber Security and Space). Listed on the Milan Stock Exchange (LDO), in 2020 Leonardo recorded consolidated revenues of €13.4 billion and invested €1.6 billion in Research and Development. The company has been part of the Dow Jones Sustainability Indices (DJSI) since 2010 and has been confirmed among the global sustainability leaders in 2021. Leonardo is also included in the MIB ESG index.
